ISACA VANCOUVER · OCTOBER 11, 2026

Ready for rehearsal.

Today, 13:30–16:30 Pacific. Chris directs; Vipin drives the game and video. Use the complete rehearsal below: all six current films, final prepared AI replies and the latest 85-minute show plus 20-minute Q&A. Nathan coordinates the event; Levi verifies the venue route.

First five moves

1. Open the complete rehearsal and wait for all six actual films and native captions to load.
2. Use **Open control window**. Keep stage and control in the same Chrome profile on one laptop. Share or project the stage window.
3. Click the stage once to enable film sound. The control preview stays muted. Captions default off.
4. Use GO to advance. Films hold at their real endings; Pause/Restart remain available. Play the selected opener and closing externally during the black hold cues.
5. Use the clearly labelled rehearsal counts. Demonstrate real Kahoot only when its actual session is available. The AI reply appears after the audience choice.

This rehearsal has separate settings, media and sync. It does not replace the live show’s saved votes or uploads.

Today’s dry run

PACIFIC	SEGMENT	SHOW THE GROUP
13:30–13:45	Prepare the system	Load all six films. Confirm one laptop/profile/origin for stage and control, polling, sound and the independent backup.
13:45–15:30	Complete timed run	Run the 85-minute show followed by 20-minute Q&A. Preserve six ten-minute rounds and read every vendor chat before the next arrival.
15:30–16:15	Recover under pressure	Exercise pause/restart, offline reload, failed-film fallback, polling ties, score rewind, blackout and external-video switching.
16:15–16:30	Record decisions	Confirm selected media, cue calls, measured reading pace and remaining AV/polling checks. Assign every remaining item an owner.

The final AI set

Prepared responses supplied by Chris on October 9 and reissued October 10. These are not live model calls. Full original reasoning is in the operator panel.

ROUND	PROVIDER	CHOICE	CONFIDENCE
1	ChatGPT	B	95%
2	Claude	C	75%
3	Grok	D	70%
4	Claude	B	70%
5	ChatGPT	C	97%
6	Grok	C	68%

Reported answer confidence is distinct from the 87%/94% compromise estimates inside the incidents. No model version or separate risk statement was supplied.

Keep the reveal clean

- All six debate screens say only **Cyber Judges Debate**. Questions and decision notes stay with the operator and host.
- One audience poll per round. Round six uses the same rules as rounds one to five.
- App transitions are silent. Original beds and stings are manual AV cues; stop beds before films.
- The countdown bed is 30 seconds. If used during a 45-second poll, start it for the last 30 seconds.
- After the closing and host/judge discussion: Futureproof CTA, then the protected 20-minute audience Q&A, 19:00–19:20 Pacific.

Decisions before the event

DECISION	RECOMMENDED DEFAULT	OWNER
Selected films	Complete 104-second opening and 98.208-second combined closing/credits are ready for review. Chris may replace them. Measure opening + rules in five minutes, closing + switching in two.	Kris/Chris; Nathan/Vipin time handoffs
App machine	Stage and control on one laptop/profile/origin; the MacBook Pro prepared independently as backup. App sync does not span two laptops.	Vipin/Nathan; Levi confirms output route

DECISION	RECOMMENDED DEFAULT	OWNER
Real polling	Six single 45-second questions. A red triangle, B blue diamond, C yellow circle, D green square. Verify the actual session and mappings.	Chris/Vipin
Physical rehearsal	October 14, 14:30–16:00 technical slot. Record projected text/chat/QR, soundboard gain, source switching and fallback. Today's three-hour dry run includes the full 105-minute show/Q&A sequence and failure checks.	Nathan/Vipin/Levi

> The 90-minute venue slot cannot fit the full 105-minute show/Q&A sequence plus setup and failures. Browser checks establish software/media behavior; the crew records actual venue acceptance.

For a saved show

Fresh rehearsals use the latest timing and final AI set. Existing sessions retain their earlier timing, answers and scores. Export results and **Reset for doors**, then **Apply October 14 plan** and select **Use Chris's final prepared responses** under Set up the night. Uploaded media and custom pasted replies are preserved. Inspect any custom replies; choose **Back to the prepared answer** when Chris's response is intended.

Scenario 4 is the 73-second paced chat: five empty seconds, each reading window plus five suspense seconds, then the final conversation held for Vipin's GO. Use **Use current release** for an old saved cut. Load all six current films before rehearsal. Keep the chosen origin and browser profile consistent. Record final decisions in the existing opening, closing and rehearsal issues.

Wednesday, October 14

17:35–19:00: 85-minute show. **19:00–19:20:** audience Q&A. The six rounds retain ten minutes each; host/judge discussion and Futureproof CTA fit before Q&A.

Technical crew and Chris arrive 13:00; Vipin 14:30; Nathan and Dominic 15:30; judges and registration 16:00. Doors 16:30, house to seats 17:25. Chris and Dominic rehearse cueing Tuesday; Shashi receives his catch-up walkthrough. Nathan owns production coordination; technician and volunteer assignments still need confirmation.
